

collaborative work or organizing, and to connect, map and assess the feasibility of various goals, key activities to bring them into a knowledge-exchange network (KIN) platform in year 2. College and University officials will receive their presentations, recommendations, suggestions, and recommendations through newsletters, by attending strategy and planning of each state to identify ways for implementation (assess) that activities were realized and some success and challenges. The capacity of each organization, collaboration, an expected relationship, a role of the platform under the scope of the Gender Partnership Program (GPP) and National Development Plans (NDP) will be shared and consistent with the World Health Organization Gender Mainstreaming Strategy for Research and Care (<https://www.who.int/gender>).

To accomplish objectives, the qualitative methods of knowledge mapping involve four major domains: knowledge, experience, technology and social norms. Existing knowledge, technology and social norms involving cross-sector, gender and health partners were investigated to increase the visibility of knowledge activities.

To map knowledge on gender and reproductive health issues, cross-sector representatives from Uganda to June 2022, primarily in Uganda Health Program and Gender with one day of the virtual open consultation. A roster of the central, local and district and village network.

The consultation was identified and implemented in a decentralized manner with 16 focus areas of participants. The knowledge mapping led to the development of an evidence-based strategic knowledge categories (local, community, local and global) and an overall gender health network. The network is organized into four main categories: local, community, local and global. The network is organized into four main categories: local, community, local and global. The network is organized into four main categories: local, community, local and global. The network is organized into four main categories: local, community, local and global.

2022-23. 27 June 2022 in Kampala, Uganda, participants received a pre-consultation briefing focusing on the objectives of the consultation, their duration and how they will be organized. The meeting was organized through a virtual platform with experts who shared their perspectives on the state of knowledge and the an strategic categories of consultation. The Uganda Health Program team will identify 10 participants to engage with 10 days.
