

# Avoidable Deaths Network

**Available Deaths Network's Winter Spring 2016 - 2017 Report**

The Avoidable Deaths Network (ADN) is pleased to announce the upcoming winter, 2016-17, edition to address conditions related to being in winter-spring months.

Here are some key events and changes:

The network members have put in place a number of key initiatives to address winter, including: reviewing and updating policies to help with winter; and developing winter action plans and safety plans for members and stakeholders in the network.

The network will be focused on the ground work, such as: activities and training. These activities are aimed to address respiratory infection control measures, influenza, water issues, and equipment prepared to prevent falls in winter months. Through the Winter 2016-2017 edition, the report is set to set the framework for ongoing work.

The details of the upcoming work for the Winter Spring 2016-2017 are:
