

Avoidable Deaths Network

**Avoidable Deaths Network's Winter Spring 2015
2015 Update**

The Avoidable Deaths Network (ADN) is pleased to announce the upcoming winter, spring and fall 2015 updates, available exclusively using the winter spring menu.

There are two types of updates: direct and open.

The direct updates are delivered to a closed group of people. The updates are generally sent to government officials, health care providers, academic researchers, and community organizations. In turn, all direct updates include an invitation to join the network.

The open updates are facilitated by the general public. ADN's website and Facebook page provide an update for anyone (researchers, doctors, students, consumers, politicians, media, etc.) and questions submitted to avoidable deaths by 2015. Each Thursday the Winter and Spring updates appear in our blog on the Avoidable Deaths Network.

The details of the upcoming updates for the Winter Spring season are below.

Upcoming Update 10: Winter and Spring 2015
