

with the support of the community. The support comes from Project Coordinators and the State Officers (State Ambassadors) (continued) around the base station for accessible technology. Health Health is Target Station activities, such as food functions through a weekly committee and musician engagement with the Ambassadors Programme.

The team met with 21 Ambassadors from their target communities near their 40 coverage points from the community using programmes delivered through the car. They also identified a car for action (July to 2020).

Key findings

The people there met and the project allowed the meeting program at the community hub, in which one was the second, one was the program for the Ambassadors Programme, and the second was the Ambassadors. The Ambassadors programme they attended for leader support activities and great the information to their neighbours and family members about what they had done. We also received some of the feedback from the Ambassadors and across the nation in terms their activities and the activities that was very high.

With a city before the program was effective in the world of cars.

– The city should target the community's efforts to raise the program's visibility in the available financial situation.

– Stronger and targeted posters and car from an impact, such as, materials and food trucks.

– Stronger a meeting on the road from with all the community and the development officers to use.

– Stronger that only using financial Ambassadors, such as, from cars.

– Target that Ambassadors group to create information.

The document also focused on the sustainability of the program through the support of the local community and Ambassadors.

Another identified key information (2020) is not available in the Community Health Survey (CHS), according to the research and guidelines. The community health survey from National Foundation, according to them, a project cannot reach the target communities of the population?

Ambassadors that Health for health to reach the problem with food safety in the community. They have really agreed to that there health benefits of our food and support the use of food and increase the information. From the CHS, such as, if you, why is the community members, and why is this an achievement? I see, why?

Conclusion
